Care and Cleaning Instructions

- Do not install tapware using any form of acidic silicones or such harsh chemicals.
- Do not apply physical items (such as tools) directly to the product.
- Never use detergents, citrus based cleaners, or abrasive cleaners and do not use undue pressure.
- Where your tapware remains dry in use, a soft damp cloth can be used to remove surface dust. Alternatively, a wipe over with warm soapy water is all that is required to maintain the finish in perfect condition for a lifetime of use.
- Use of wax based furniture cream should be avoided as these can result in a build-up of deposits, which could detract from the appearance.
- Normal wear and tear, lime scale, and chemicals used during cleaning can cause damage and deterioration and this is not covered by the warranty.
